Applicant's arguments with respect to claims 17,18,31-35 and 37 have been considered but are moot in view of the new ground(s) of rejection.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 17,18,31,35, and 37 are rejected under 35 U.S.C. 102(e) as being anticipated by Levanon, et al. ("Levanon")(US 6,541,181B1)

Levanon discloses a positive photoresist(col. 1, lines 15-20) which are disclosed as having acetal groups formed from the reaction of aldehydes and polyols (col. 12, lines 55-65 and col. 13, lines 2-7). There can be electronegative substituents such as Br(col. 10, lines 30-37). The application and development of the positive photoresist is also disclosed(col. 22, lines 27-55). The substrate coated with the photoresist would be an article of manufacture, and the disclosed plate is interpreted as a microelectronic wafer, as a circuit is disclosed. The composition is also made sensitive to radiation (col. 8, lines 60-65).

Allowable Subject Matter

Claims 1,3-16 are allowed.

Claims 32,33,34 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior art of record does not disclose or suggest the recited wavelengths.
